Lab Submission 3
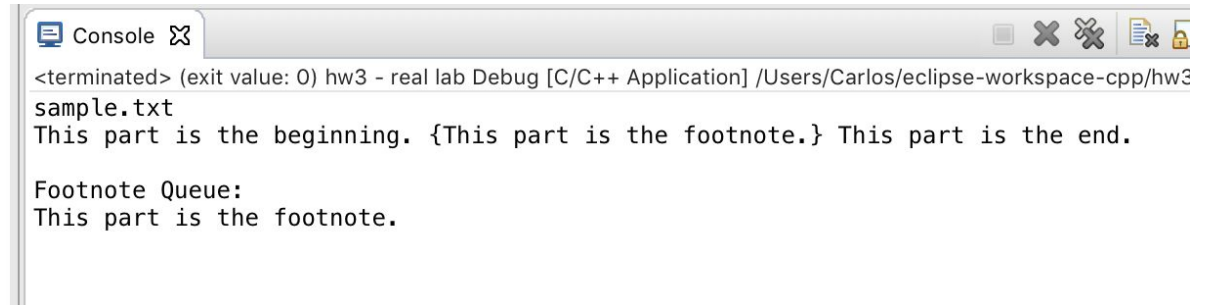

1. Footnote Collecting Program
   a. *The sample.txt is read and printed out in its entirety. The program then collects all text contained within brackets and inputs it into a queue. The queue (list of footnotes) is then printed.*

   ```
   Console ⊠                                              ▢ ✖ ✖ ▤ ▤
   <terminated> (exit value: 0) hw3 - real lab Debug [C/C++ Application] /Users/Carlos/eclipse-workspace-cpp/hw3
   sample.txt
   This part is the beginning. {This part is the footnote.} This part is the end.

   Footnote Queue:
   This part is the footnote.
   ```
